

CASUALTY EVACUATION ASSESSMENT

To complete the assessment successfully you will need to combine upper and lower body strength and co-ordination and complete the test within 40 seconds.

- The candidate must firmly grasp the carrying handle at the back of the dummy's head with both hands.
- The candidate must keep their body upright and back straight when picking up the dummy.
- Drag the dummy from the start cone, walking backwards along the 30 m route to the finish line.
- The assessor will offer guidance so there is no need to turn around to look for the corner. The assessor will inform when to turn.
