

BE ROAD SAFE

The coronavirus pandemic has forced us all to stay at home more. As restrictions relax, you may be getting out and about more or returning to the morning commute.

It means we may not have paid as much attention to our cars as we normally do, so before you set off remember the following:

- **Fuel** – check that you have enough fuel for your journey
- **Lights** – check that they are still working
- **Oil** – monitor the oil level in the engine itself, don't just rely on the warning light on the dashboard
- **Electrics** – while you are under the bonnet, make sure you check the battery level
- **Rubber** – make sure your tyres have enough tread and depth so that they are compliant with the law. Also check that the tyre pressure is at a sufficient level

#safe4summer

Also, remember the fatal four that are the primary cause of most road traffic collisions

Drink and drugs

Don't drink or take drugs and drive. The only safe limit is none, you can still be over the limit the morning after

Speeding

Keep to the speed limit. It could be the difference between life and death

Seatbelts

Always wear your seatbelt. Make sure any passengers you are carrying are wearing their belt. Make sure children are in an appropriate car booster seat if needed

Mobile phones

If you're caught using a handheld phone while driving, you will get six penalty points on your licence and a fine of £200. Switch it off before you drive

Follow these safety tips and enjoy a safe journey. Find out more by visiting
